

Assam PWD Computerization Project

GCS Consulting services recently concluded the Program Management assignment at Assam PWD. A large ERP solution has been rolled out for all the functions of the Public Works Department of Assam. In addition a Roads Maintenance Management system (RMMS) & Roads Information Management System (RIMS) was also specifically built for the department. The project involved Re-engineering some of the processes of Assam PWD, As-IS and To-Be studies, Process mapping to the selected ERP solution, Training and Project Implementation. GCS undertook detailed User Acceptance Testing of the rolled out system, which led to the system going live.

Tata Consultancy services have been the implementation vendor. The project was implemented in a record time of nine months. GCS was responsible for conceptualization, Scoping, Bid Process Management and Program Management of the project. The project was funded by the World Bank and has been termed as a big success in the e-governance domain.

The TCS and GCS teams pose in front of the server going live at Assam PWD.
