

ICT Strategy and Roadmap Creation for NIFT

National Institute of Fashion Technology (NIFT) had engaged National Institute of Smart Governance for “Development of a Roadmap for Information and Communication Technology (ICT) based governance at NIFT”. NISG appointed GCS to work on this initiative during the project conceptualizing phase. The consulting project for project conceptualization included the activities mentioned as follows:

- Study of the Institutional Strategy
- List of services being provided by NIFT
- Stakeholders analysis to assess the current (as-is) level of satisfaction in respect of the services provided by NIFT and desired (to-be) levels. This required a detailed survey to be conducted for all stakeholders of NIFT.
- Study of various operational processes
- Identification of key processes impacting service levels
- Identification and recommendation of the best practices being followed at other institutions / organizations suitable for the NIFT environment.
- Development of ICT strategy and plan for NIFT
- Prioritize portfolio of ICT projects for NIFT
- Identification of suitable resource models
- Preparation of RFP document
- Bid process management

Technical Architecture

The software applications proposed for NIFT included:

- CBT; WBT; LMS; LAS; Online Examination systems to run the courses.
- High End Graphics Software for design
- Enterprise Software at Delhi Linked to all the centers.

- Intranet with mail server at Delhi.
- Elaborate MIS & DSS Systems.
- Document Management System
- Workflow System
- Finance and accounting – Evaluate Tally and its integration
- E'procurement; e'Admissions, e'recruitment
